

BATTLESHIP

MERAZ - ANNUAL TECH FEST · IIT BHILAI

A live multiplayer naval combat tournament played on **custom-built wireless hardware consoles** — not on laptops or phones. Four teams battle simultaneously to destroy each other's hidden fleets while the entire audience watches the war unfold in real-time on a projected dashboard.

01

Deploy Your Fleet

Each team secretly places ships on their grid via a handheld touch console we engineered from scratch.

02

Attack Any Rival

On your turn, pick any of the 3 enemy teams and fire a torpedo. Hits and misses appear instantly on all screens.

03

Strategize & Deceive

Form temporary alliances, bait enemies into wasting shots, read body language. Pure psychological warfare.

04

Last Fleet Standing Wins

Lose all ships = eliminated. Finals happen live on main stage in front of the entire fest audience.

Main Screen Branding

Your logo on the live spectator dashboard projected on the auditorium screen — visible to hundreds throughout every match.

Logo on Hardware

Your brand physically on game consoles every participant holds. Tangible branding — not just another digital banner.

Viral Content

Teams yelling, displays glowing, crowds cheering — content that goes viral on Reels and Shorts. Your brand in every frame.

Premium IIT Audience

Direct access to engineering students, researchers, and delegates from 50+ colleges — high-value demographic.

First-of-its-Kind

No other college fest has a hardware-based multiplayer game. Sponsoring something genuinely new builds innovation equity.

Multi-Day Visibility

Tournament rounds run all 3 days — from qualifiers to the main stage final. Continuous branding from start to trophy.
